Intro to Heavy Duty Mechanics

This introductory course gives high school and high school age students a look into the world of heavy duty equipment and diesel engines. Students will spend time in the classroom and diesel lab, take field trips to a local shop and interact with industry guest speakers.

12050115 © Alaska Division of Community and Business Development, DOT&PF

Half of the time is spent hands-on working on diesel engines in our well equipped diesel lab.

Limited to current high school and high school age students.
