

Engineering Presentations by JDHS ACE Students

Ben Roemeling talking to local architects and community members about proposed design for an aquarium on the Juneau waterfront on Wednesday, May 20 at the JDHS library.

Shawn Nesheim, Ben Roemeling, Jacob Pernula, Evan Punogbayan, Willy Strehler talk with architects and community members about their designs for three community projects.

Three student teams, Shaun Nesheim, Alex Botelho, Willy Strehler and Evan Punogbayan, Jacob Pernula and Ben Roemeling, presented PowerPoint presentations, display boards, and detailed architectural drawings and plans for three community project designs, an aquarium, performing arts center and state capitol, to local architects, engineers and community members as the culminating project for their Project Lead the Way, Civil Engineering and Architecture class taught by Craig Mapes. This class is part of the JDHS Architecture, Construction and Engineering-ACE academy and provides students with a rigorous pre-engineering curriculum in project planning, site planning, building design and project documentation and presentation. Students are currently designing a house plans that will be built by students in the ACE Academy next school year. For more information about these classes and the house building project for next year, contact teacher Craig Mapes, 523-1636, or counselor, Barb Conant, 523-1557.
